Dormant Accounts Re-engagement Plan

Strategy mind map: verify the audience, start a useful conversation, then earn a return case and repeat work.

3,349	623	Unknown	30–50
account codes in the list	records with email candidates	confirmed dormant count	proposed pilot practices

The two attachments contain the same list. Email candidates and inactive practices still need verification. All campaign targets are proposed.

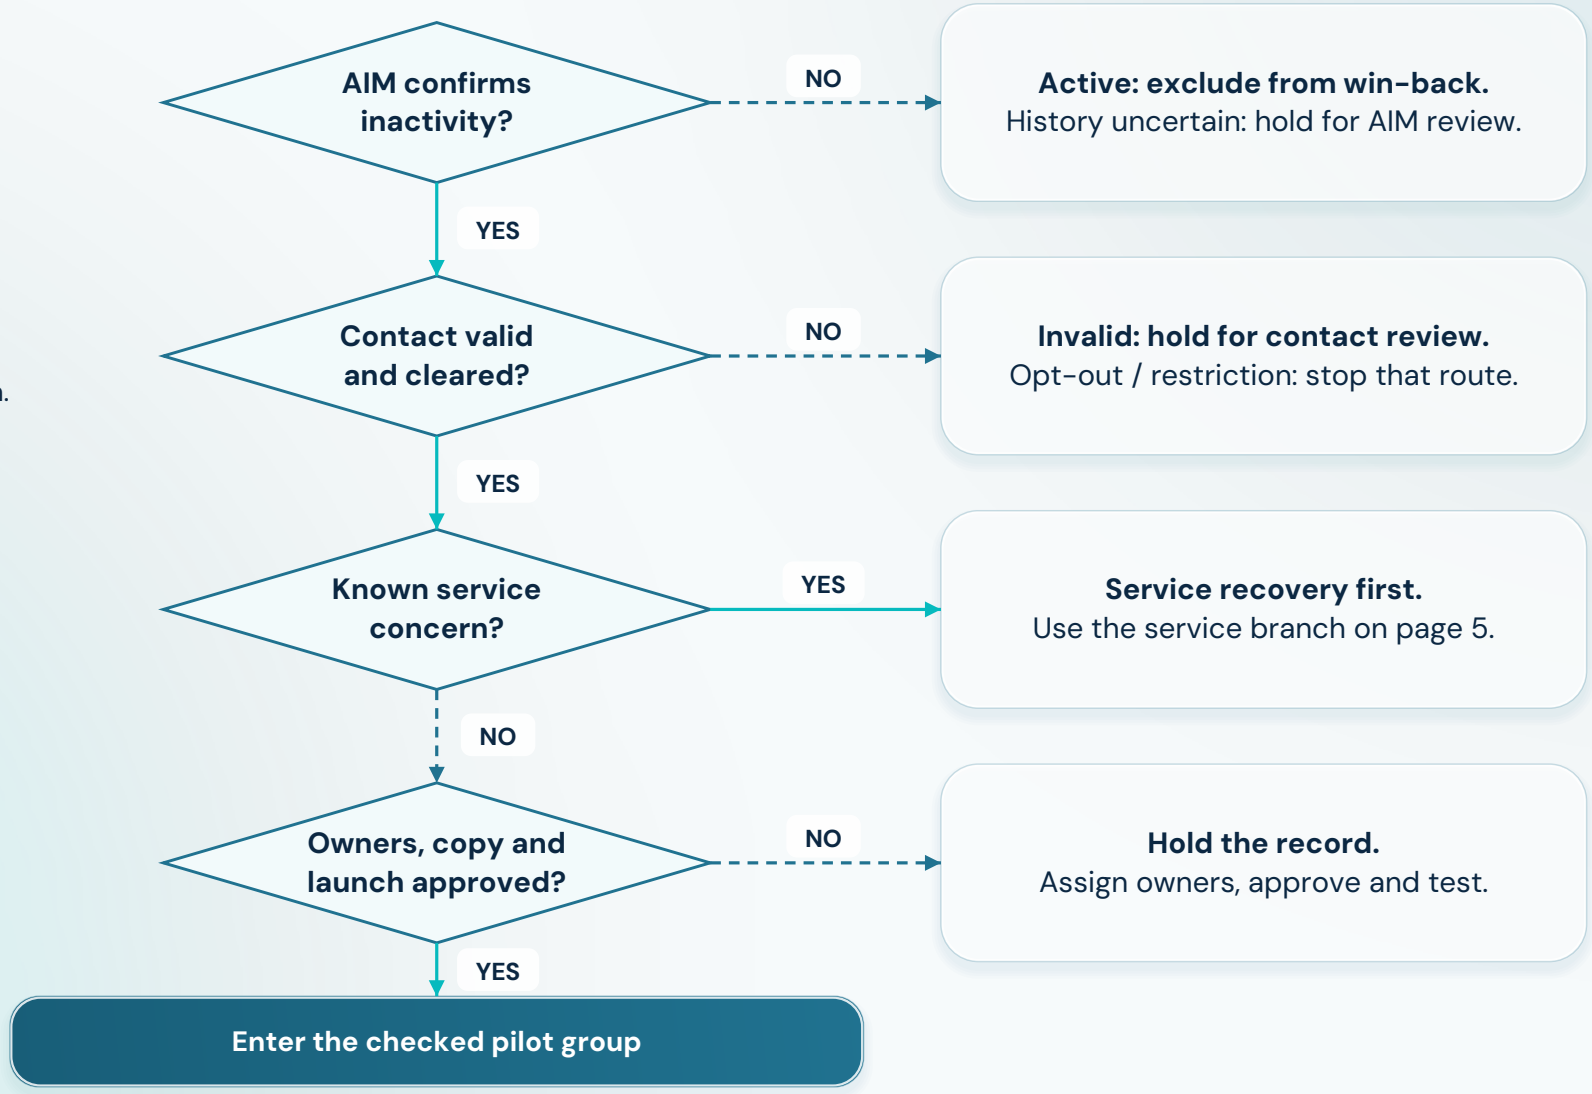

Who enters the campaign?

Read from top to bottom. A YES / NO decision sends the record to a clear next action.

PROPOSED GROUPS

90–180 days: recent pause.
181–365 days: longer gap.
Over one year: verify first.

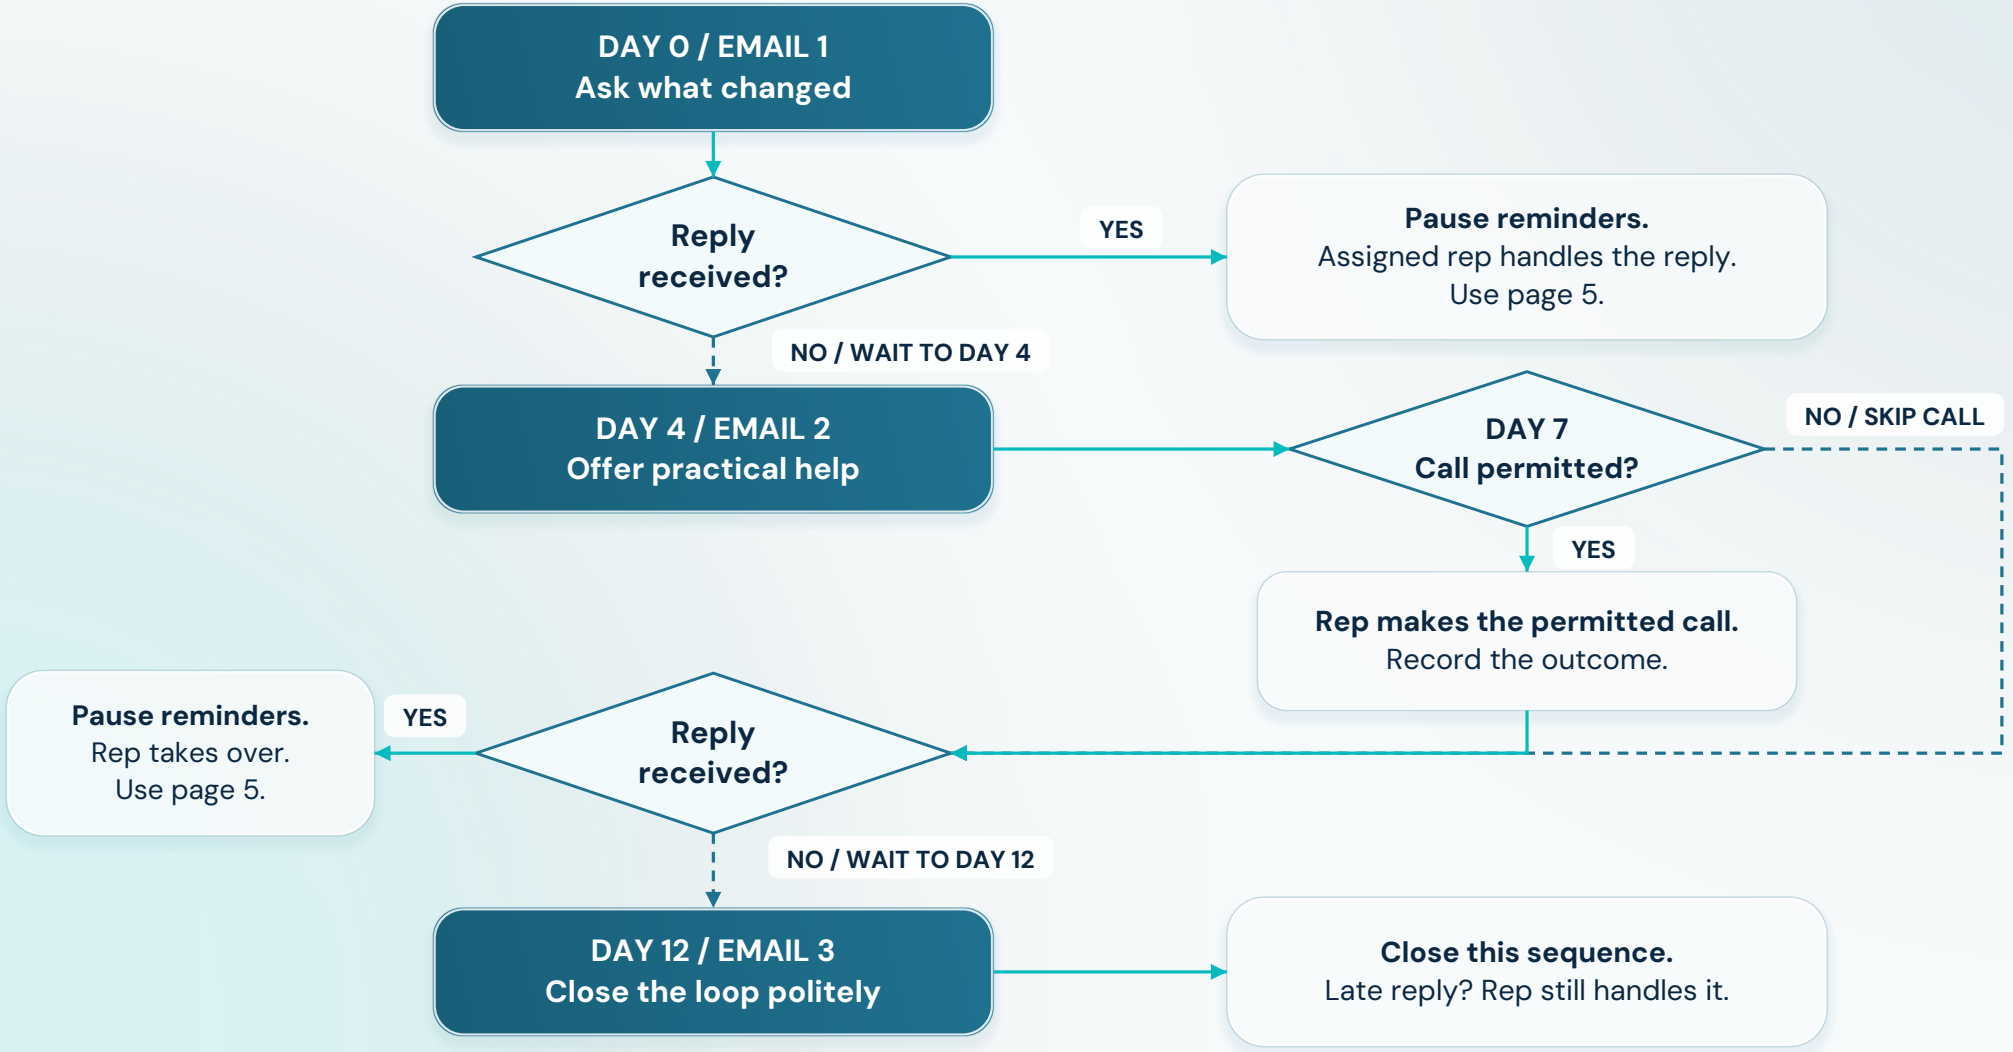

AIM adjusts these ranges to the practice's normal ordering pattern.

Use normal ordering patterns when deciding inactivity. Link account codes only after AIM confirms the practice relationship.

Email sequencing: what happens next?

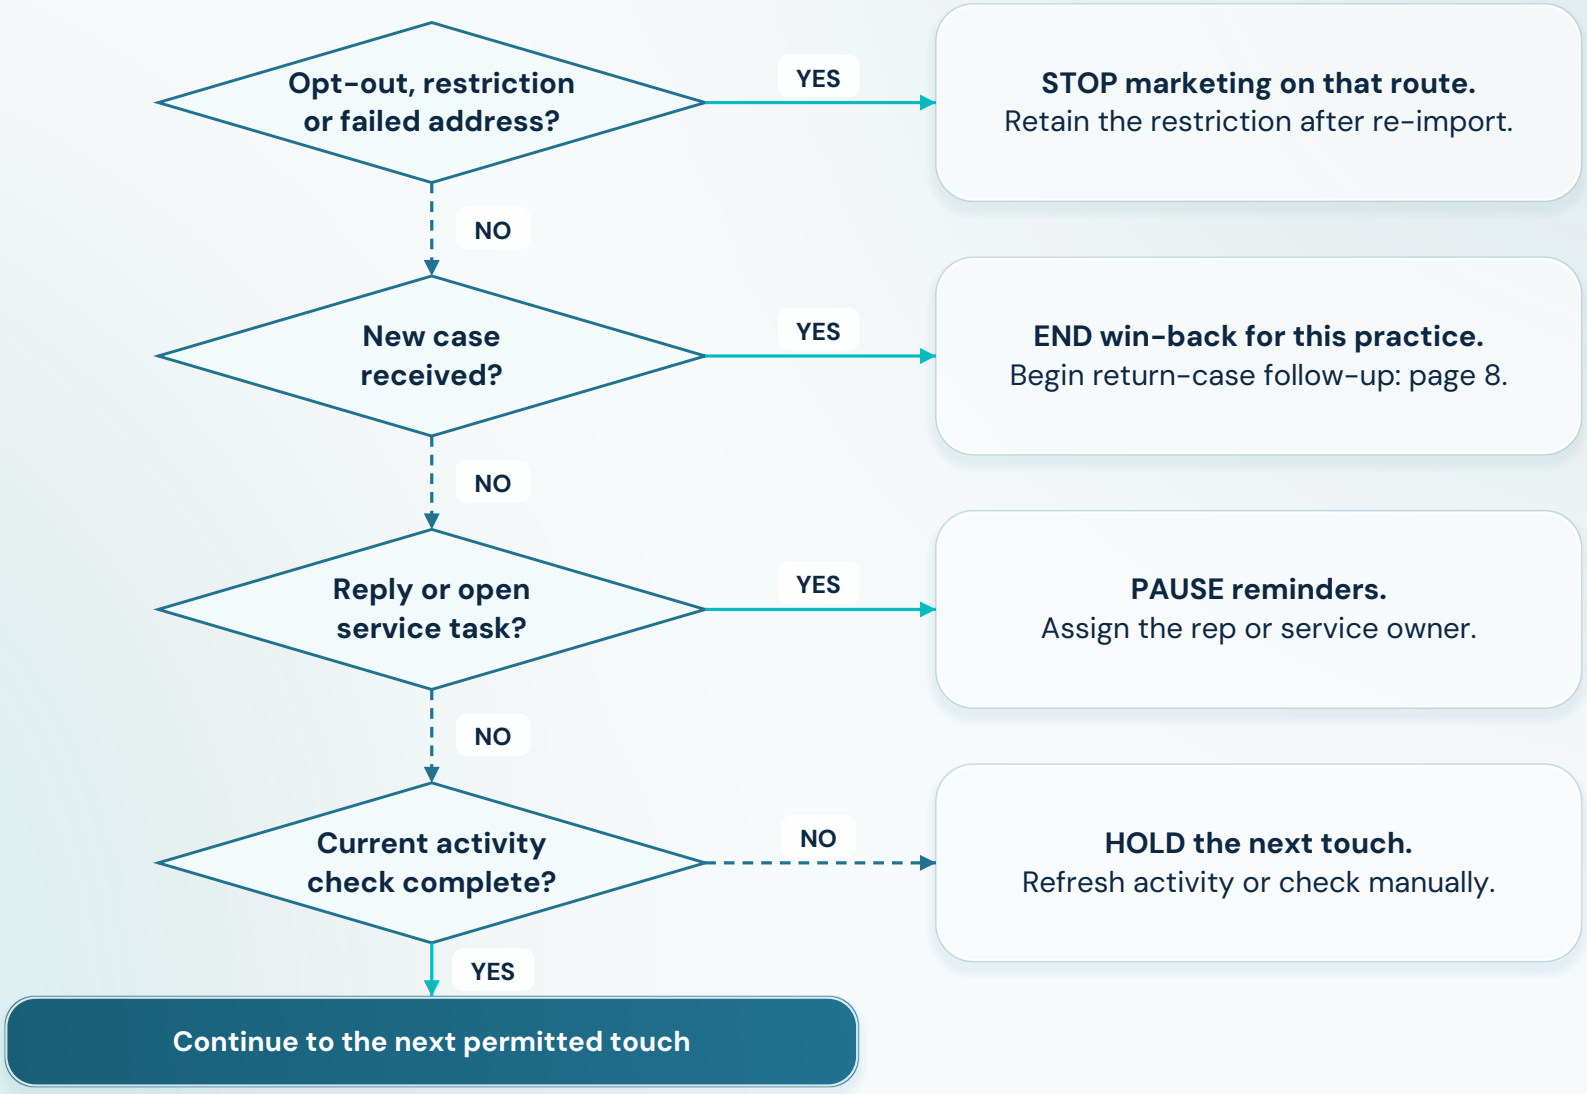

Before EVERY touch, use the checks on page 4. Day 0 begins when the verified practice enters.

Reply = pause. New case = end win-back. Opt-out = stop marketing. A skipped call does not cancel the later email.

The check before every email or call

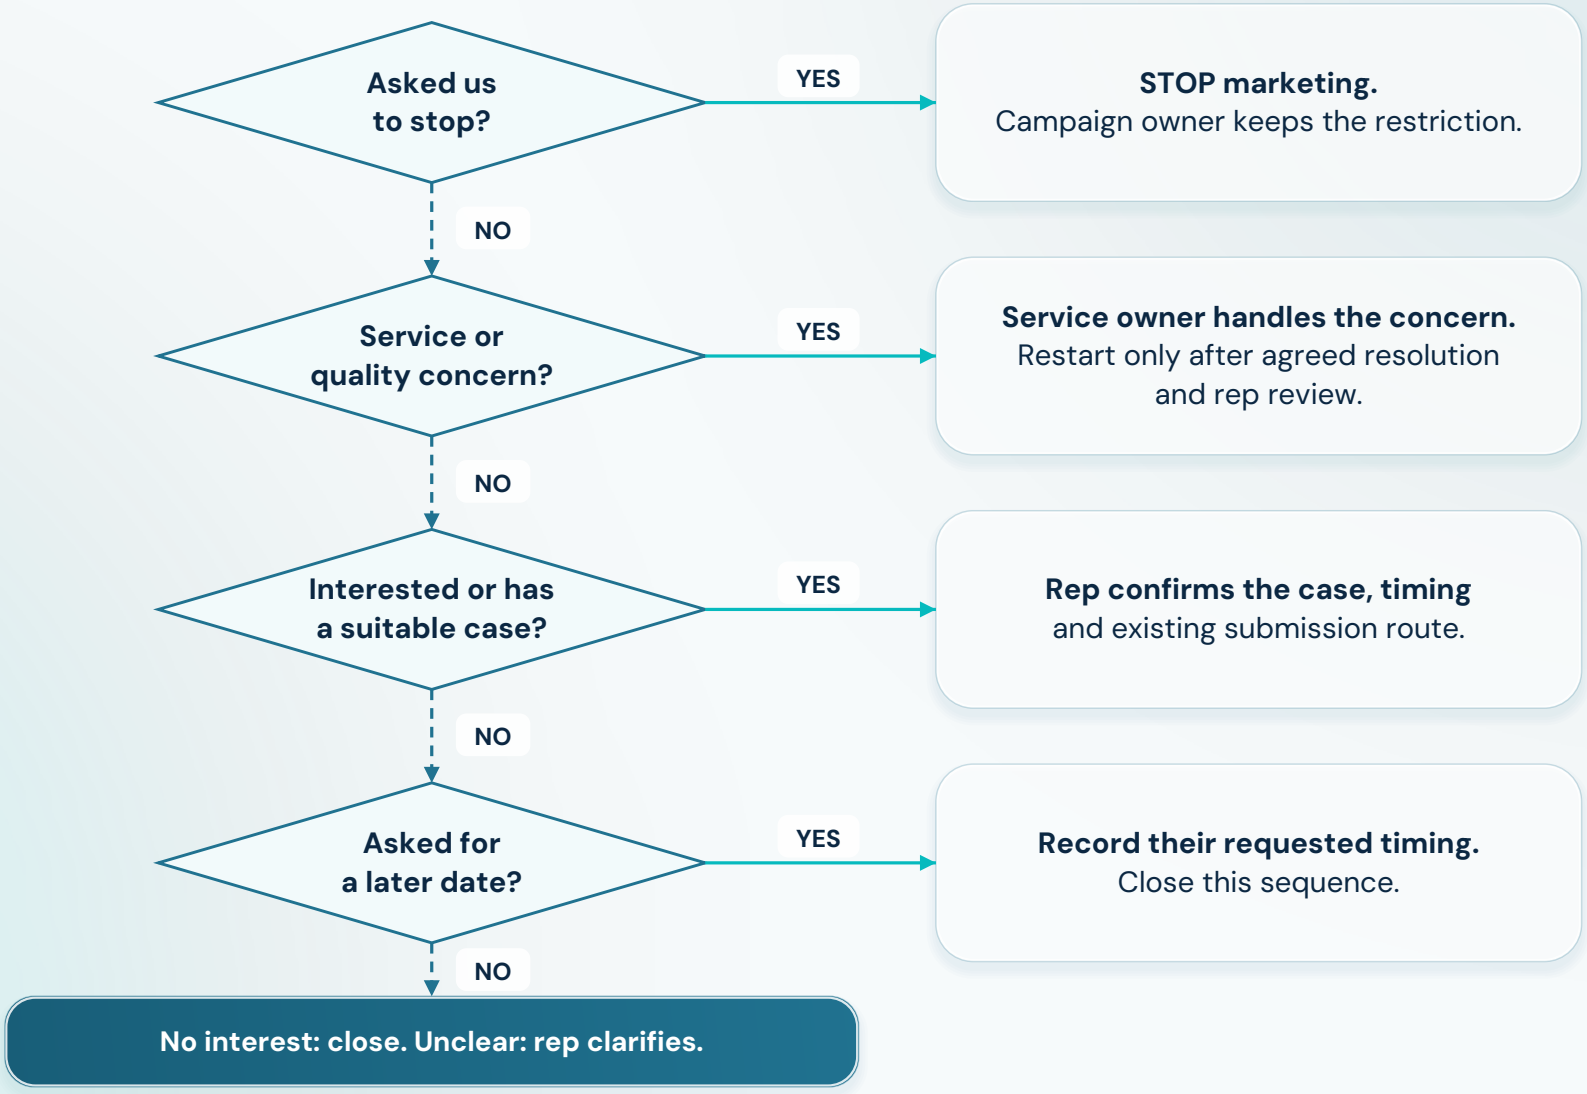

A contact list alone cannot detect new cases. Use a current activity update or an assigned manual check.

A new case and a paid invoice are different events. Do not resume a paused sequence automatically after a reply.

When a practice replies

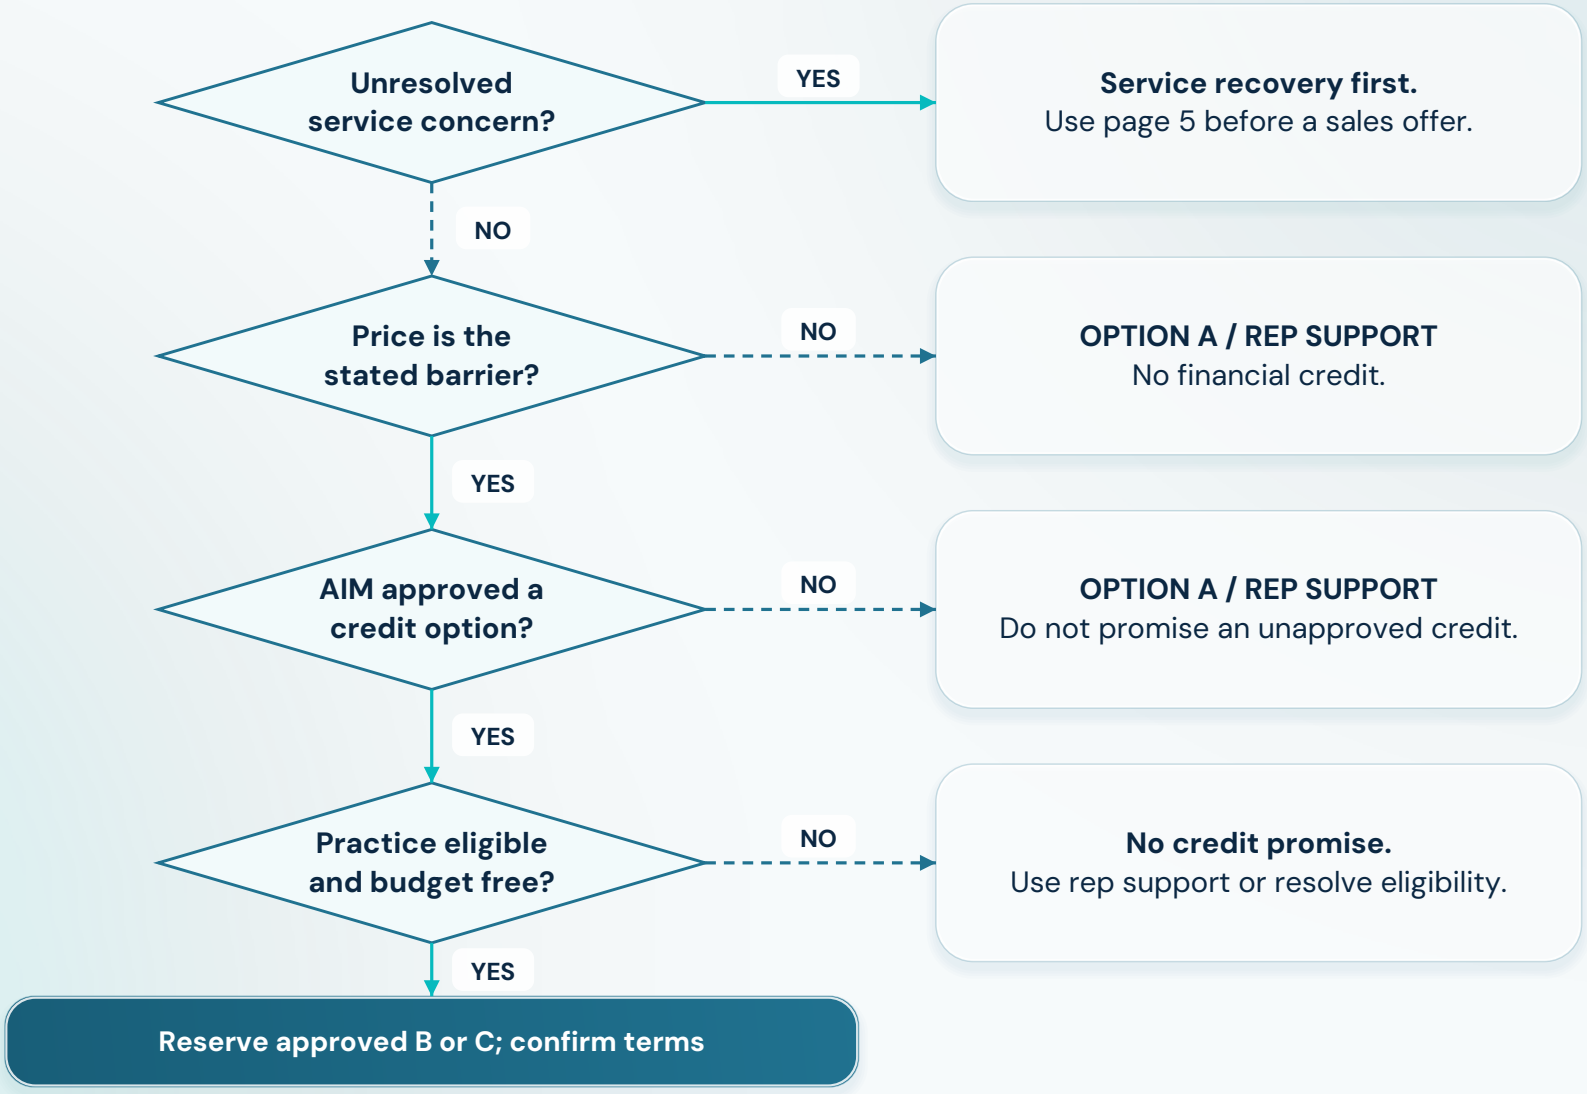

Reminders stay paused while a person handles the conversation. Proposed response target: one business day.

Keep patient information in AIM's approved case systems. A reply never authorizes an unapproved credit or service claim.

Which campaign or offer fits?

Default: a named rep helps with the next case. Financial offers require AIM approval and a reservation.

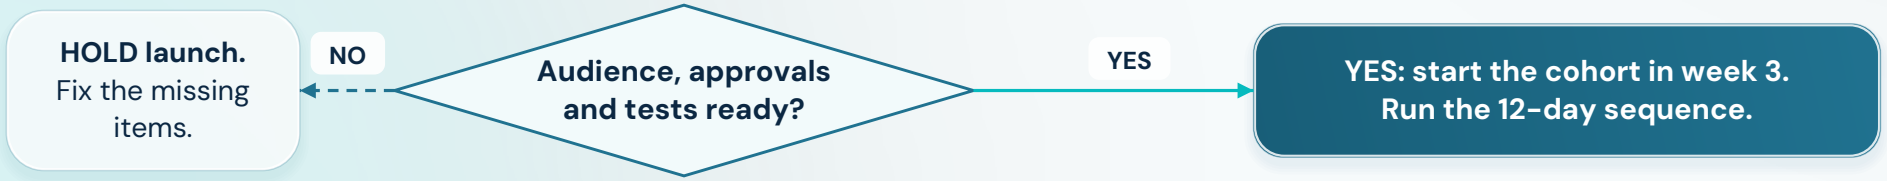

A workflow problem calls for help with pickup or digital submission. Full credit terms and budget limits are on page 10.

Execution plan and six-week Gantt

Prepare and approve, run a small pilot, then review. Bars show timing, not full-time staffing.

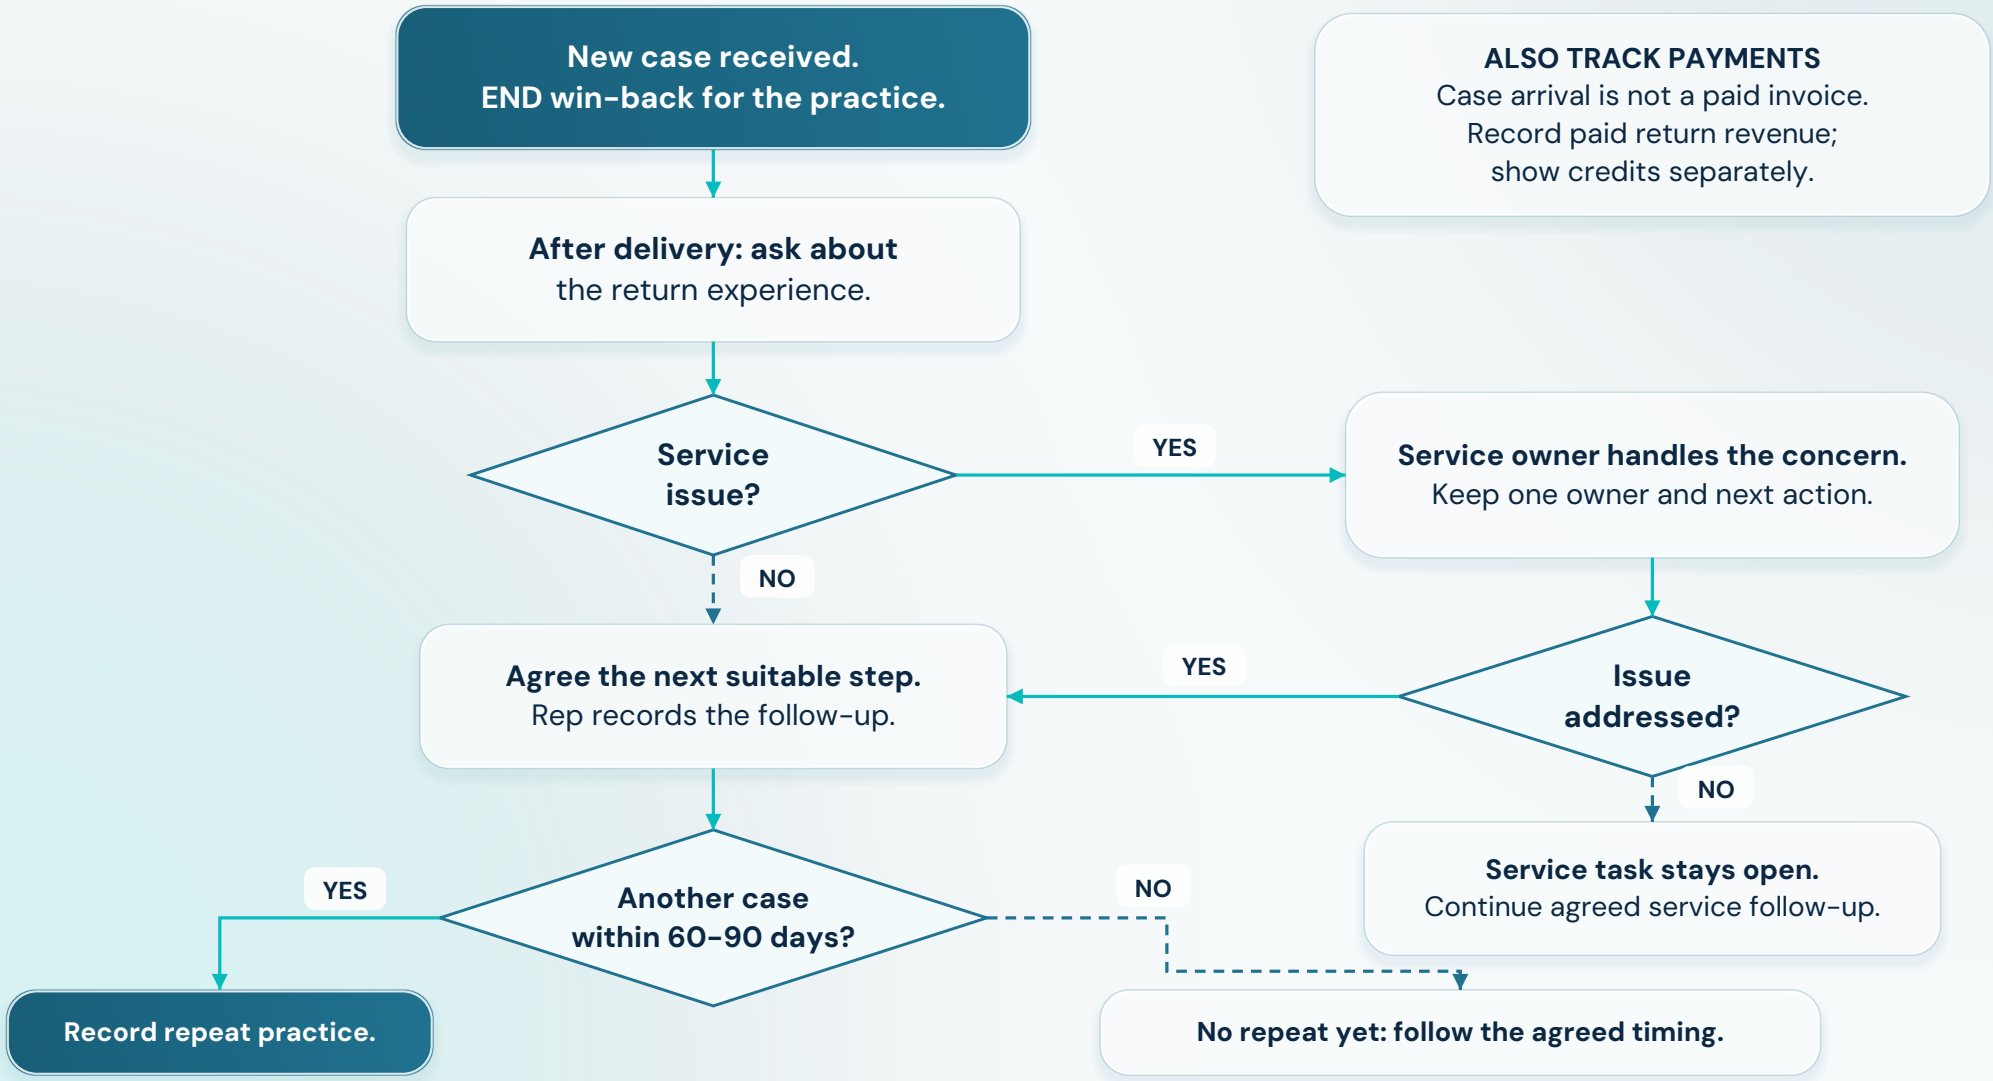

WEEK 6: review useful conversations, paid return cases and cost. Track repeat cases 60–90 days after each return.

Weeks start at an agreed kickoff. Late starts, missing data or delayed approval move the dates. Manual checks continue until updates work.

A return case starts the next relationship

End the win-back sequence for the whole verified practice, including its linked customer codes.

Report unique practices and stated date windows. A small pilot helps learning; it does not prove a guaranteed conversion rate.

Reference: the three email drafts

These are the messages in the flow on page 3. Drafts require AIM approval; replace every placeholder.

EMAIL 1 / DAY 0

Subject: A quick check-in from AIM

Hi [First name],

I'm [Rep name] from AIM Dental Laboratory. It has been a while since your practice sent us a case.

Have your lab needs changed, or was there something we could have handled better?

Reply here and I'll help with the next step.
[Rep name], AIM Dental Laboratory

rep's work email / customer@aimdentallab.com
802 Myrtle Avenue, Brooklyn, NY 11206
Unsubscribe: [working unsubscribe link]

EMAIL 2 / DAY 4

Subject: Help with your next case

Hi [First name],

Have an upcoming case to discuss? I can help confirm how to send it and the timing before you commit.

Would a short call be useful? Reply with a good time to reach you.

[Rep name], AIM Dental Laboratory

rep's work email / customer@aimdentallab.com

EMAIL 3 / DAY 12

Subject: I'll close the loop for now

Hi [First name],

I'll close the loop for now. If you'd like to try AIM again, reply "next case" and I'll help arrange the next step.

If the timing isn't right, let me know when a check-in would be useful.

Thank you for considering us again.

Unsubscribe: [working unsubscribe link]

Email 1: learn what changed. Email 2: make the next step easier. Email 3: close the loop politely.

Use a monitored rep inbox, truthful sender and subject details, a postal address and a working opt-out. No messages have been sent.

Reference: offers and workload

Offer amounts and staffing are proposed. AIM approves eligibility, margins, accounting, dates and the final wording.

A / NAMED-REP SUPPORT

No financial credit. A rep helps confirm the next case, timing and submission route. AIM confirms staff availability and scope.

B / UP TO $25

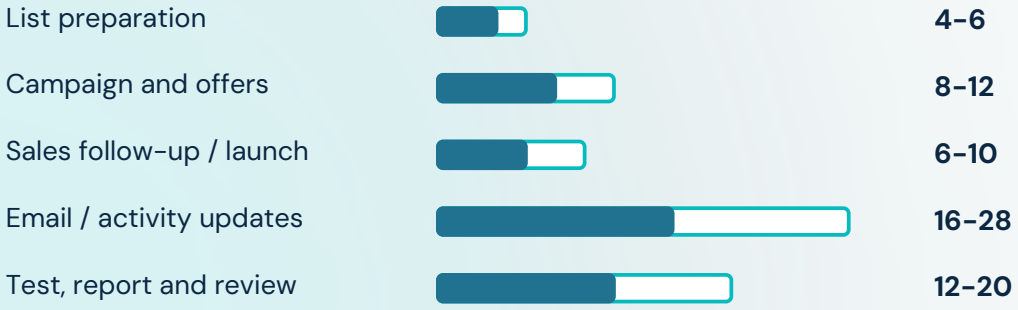

Toward the actual pickup or shipping charge on the first return case with lab fees of at least $150. Reserve up to 10 offers. Maximum credit budget: $250.

C / $50 RETURN CREDIT

First eligible return crown-and-bridge invoice with lab fees of at least $250, before tax and delivery. Reserve up to 10 offers. Maximum credit budget: $500.

B and C are alternatives. One offer per verified practice, no stacking. Reserve BEFORE communicating. Use within 30 days of acceptance. No credit on old invoices or canceled cases. Staff time and operating costs are additional.

46-76 additional project hours

AIM allowance: 4-8 hours upfront, then 1-3 hours per week for a small pilot. Confirm team capacity.

Assumes existing sending tools and usable recurring exports. Excludes the completed audit, software fees, credits, ongoing rep/lab case service, extensive contact research and a custom Labtrac or QuickBooks API connector.

Planning range, not a quote. Dark bars are lower estimates; outlined extensions are upper estimates, on a 0-30-hour scale.

Reference: launch checklist and scorecard

Put names next to the roles, then test the yes/no routes before live sending.

READY TO LAUNCH?

- ☐ **Audience: 30-50 inactive practices checked; contacts and restrictions reviewed.**
- ☐ **Ownership: Named rep, service owner, campaign/report owner and approver.**
- ☐ **Approval: Final emails, any offer, reserved credit cap and kickoff signed off.**
- ☐ **Activity: Recurring update or named manual checker before every touch.**
- ☐ **Tests: Duplicate import, reply pause, new-case exit, opt-out, bounce and budget cap tested.**

WHAT WE REPORT

Useful conversations: unique practices with a meaningful reply.

Return-case rate: first-return practices / unique practices contacted. Show the counts and dates.

Paid return business: paid return invoices for the reporting period; show credits separately.

Repeat work: another case within 60-90 days after return.

Recovery cost: credits used and staff time, with a stated cost basis.

SOURCES AND WHAT IS STILL UNKNOWN

Account figures: supplied OLD QB and Labtrac customer workbooks, Sheet1 rows 1-3350; Aim-account-audit.xlsx. The grids match. The lists have no activity or revenue history and the business-data as-of date is unknown. Codes may share a practice or inbox.
AIM postal address and existing case routes: aimdentallab.com/contact. Commercial email: FTC CAN-SPAM Act, A Compliance Guide for Business. Campaign rules, budgets, staffing and weeks remain proposals.

AIM approves before launch. No campaign, offer or live automation has been activated by producing this guide.
